Quality
determines
whether the price
is economical

Highest quality materials and construction alone give you fine car performance over a long period at low cost for upkeep.

Only the most modern body design and a finish of permanent luster can keep your car looking well for years.

And that's what you get in a Chevrolet! Quality design, quality construction, quality appearance—and many quality features the equal of which you cannot find in any other car at Chevrolet's price.

You get Duco finish in smart colors. You get Fisher bodies on all closed models. You get smart, modern, snappy good looks plus the power, performance, and dependability that make Chevrolet meet your highest ideals of economy.

Come in—let us show you why half a million Chevrolets were bought last year.

NEW LOW PRICES

The Late Rev.

Wm. L. Bradley

The town of Bashaw and surrounding district suffered a great loss during the past week in the sudden passing of the Rev. W. L. Bradley, the minister of the Union church, Bashaw. Mr. Bradley had been in poor health for some little time and underwent an operation in Edmonton, which unfortunately he had not the stamina to survive.

Mr. Bradley had served his church faithfully for over twenty years in this province. At Wetaskiwin, Edmonton, Carstairs, Clive, Bawlf and Bashaw he filled the busy years with active service. To all who knew him, Mr. Bradley fulfilled the dictum of Lord Bacon, "He was a christian gentleman and one can offer no greater praise." His unflinching courtesy combined with a rare cheerfulness made him ever an agreeable companion while his sense of humor helped to make life more liveable to himself and all about him. The years which he had spent in Alberta had given him an insight into conditions, an understanding of local problems and perplexities which served to make him a wise counsellor and a trusted adviser.

In the pulpit Mr. Bradley displayed pre-eminently those qualities which fitted him for the christian ministry. His sermons breathed not only the thoughtful study of the scholar, but also the practical experience of everyday life. He did not linger long on platitudes nor weave dream pictures but with sureness and accuracy he took the living Word and expounded its unfolding meaning as God had revealed it to his soul. He spoke as from heart to heart with that sincerity and simplicity which won his hearers and by a sweet compulsion lifted tired hearts to nobler things and greater endeavors. His was one of those rare souls which feel by impulse the Kingdom of God, and looking not for reward, labor on unceasingly to make it apparent in the hearts and lives of men.

He has passed from our mortal sight, but he who served so long and faithfully here continues to serve his Master, and having fought a good fight and having kept the faith he has entered into the joy of his Lord.

—R.G.W.

World production of silver for the first half of 1924 is 117,350,000 ounces, as against 118,250,000 ounces in the first six months of 1923. Canada accounted for a production of 10,800,000 ounces in 1924, as against 10,500,000 ounces in the first half of 1923, being the third producer after Mexico and the United States, both of which showed a decline.

Saskatchewan's output of creamery butter in June amounted to 1,737,056 pounds, as compared with 1,748,000 pounds in June, 1923, an increase of 41,056 pounds or 2.4 per cent. From January to June, 1924, the province has produced 5,109,690 pounds of butter, as against 4,423,016 pounds in the same period, in 1923, an increase of 686,674 pounds, or 15.5 per cent.

Assemblies in Honor

Of Mrs. H. Holmes

Mrs. Stanley Roger entertained 20 ladies of the Ripley district Monday afternoon, August 9th in honor of her sister-in-law, Mrs. Harold Holmes, formerly Miss Evelyn Boyd, of St. John, N.B. The rooms were decorated with blue and yellow flowers. Mrs. Jesse Holmes presided at the table which was centered with a large wedding cake. Miss Ella Holmes, Mrs. L. Olson, Mrs. Geo. Bell, and Mrs. Brown, of Stettler, assisted in serving. During the afternoon the guest of honor was formally welcomed to the district by Mrs. E. W. Barrett, and was presented with many beautiful presents by the ladies present.

A pleasant evening was spent at the home of Mrs. H. Holmes on Tuesday, when between 30 and 40 friends from the Ripley district gathered there, the occasion being a reception in honor of Mr. and Mrs. H. Holmes. The evening was spent in cards and music which was followed by a dainty lunch served by the ladies. After lunch, Milton Roger, in an appropriate manner, presented Mrs. Holmes with a rocking chair and several pieces of aluminum from their friends in the Ripley district, to which Mrs. Holmes responded.

Around the Town

Miss Albright left on Monday for her home at Edmonton.

Mrs. Floyd Phelps is visiting relatives at Trechu.

Mrs. Stranathar is visiting friends at Dymant.

Roy, Crickshanks is spending a few days at Edmonton.

W. Fiskaleft on Thursday for Seattle on holidays.

H. House has been transferred to Big Valley. Mr. Kerr, of Chinook, will succeed him.

Mr. and Mrs. C. Schultz left this week for Pembroke, Ont., for an extended trip.

Mrs. Dalton, of Nono, Alaska is visiting her brother-in-law, Mr. F. Phelps.

Mr. Pyper, of Los Angeles, is visiting his daughter, Mrs. N. Spiece.

Mr. and Mrs. E. R. Hopkins left last week for their home at Sumas, Wash.

Geo. W. Angus, of Hay Lakes is spending his holidays in town and district.

Miss Ruth McLaren has received word that she has passed Grade II examinations with 60 per cent. in all subjects.

R. J. Snell, Eye Specialist, of Red Deer, paid a professional visit to Mirror on Wednesday. Watch for special announcement to next visit.

In the list of names mentioned as having passed Grade 8 exams, the name of Ella McLaren was overlooked, for which we are very sorry, as we realize all pupils like their names linked with those of their classmates on an occasion of this kind.

Life In Submarine Is Full Of Thrills

Safety Appliances Not of Much Use
Says British Naval Expert

Life in a submarine is full of thrills, more especially when danger threatens, according to a British naval expert, who gives his experience as follows:

Submarine crews are trained in the use of the air lock and safety helmets. The helmet is similar to that of a diver and is worn with a short tube which fastens round the waist.

When disaster comes upon a boat

the theory is that the crew go into the air lock, put on their helmets, open a hatch, and float safely to the surface.

But in practice things seldom run along preconceived lines. Hard

experiences have taught submarine officers and men that the chances of safety appliances being of life to the crew of a boat after an accident has befallen her are so minute as not to be worth troubling about.

Consequently they have little faith in these devices. The submarine service records contain only one authentic instance of a man saving his life by floating himself to the surface from a submarine wrecked in deep water.

That one occurred at Harwich during the war.

The vessel from which this man escaped was an E-boat; if it had been a K or an M, or any of the newest types, he could not have performed his wonderful feat.

All boats are fitted with a submarine signalling apparatus, but if the vessel is badly holed there is no chance to use this or any other safety device.

How long the crew may live entombed in a wrecked submarine is entirely problematical. Everything depends upon the ingress of water to her interior. The generally accepted view is that in disasters occurring in deep water in the open sea the end comes very swiftly.

The Debt Collector

United States Not As Liberal As Great Britain.

We doubt if anything Mr. Kellogg has said will satisfy Europe that she is being treated in any other than a begrudging spirit. "No American Government," observes Mr. Kellogg, "could contemplate an outright gift of billions of dollars."

Yet a British Government, though burdened as no American administration of recent times has been, did offer out of its poverty, to do this impossible thing. One wonders how long it will take Americans to realize that the moral leadership of the world was theirs for the taking, and that they preferred to steal the indistinguishable robe of the legal pedant and cash collector—Glasgow Herald.

Woman Rancher Loves the Life

"It's a great life and a great country," I wouldn't exchange it for any other in the world—"Thus spoke Mrs. Catherine Edwards, a 67-year-old rancher of British Columbia, who recently spent a well-earned holiday in Toronto.

Mrs. Edwards is a rancher and not merely a ranch owner, for she handles the ranch, runs a 400-acre stock farm 200 miles from the nearest railway. Incidentally she is a hunter, a trapper, a horse woman—and a maternity nurse.

British claim that British toys this stripped all other country's toys this year.

Lots of people spend the last half of their lives trying to forget what they learned the first half.

Woman Farmer's Success

Returns to England For a Visit and Will Report For Canada

Capable of riding twenty miles on horseback at any time and handling efficiently any of the multifarious duties of a farm in the west, Mrs. Edith Jones, of Pilo, Saskatchewan, who left England in December, 1924, to "come out" to a farm in Canada, reached Montreal recently on her way to England to spend the Christmas holidays there.

Interviewed at the Windsor Station while waiting for the boat train, Mrs. Jones, who hails from Leeds, Yorkshire, told the story of her experiences in Canada. She had no knowledge of farm work when she came here last December.

"I made my first visit to Canada this time last year when I came out to a farm 15 miles from Pilo, Saskatchewan, which is about 100 miles from Saskatoon," she said. "It was below zero when I arrived, but the air was so dry and invigorating that, totally unused as I was to such extremes of temperature, I scarcely noticed it and was astonished to be told what the cold really was."

"I was engaged on a farm of 400 acres, devoted to the growing of wheat, and my experience of farm work of any kind was all when I arrived. Today I can ride a horse, a 20-mile stretch, milk the cows, do my share of steepling and generally attend to the old chore when a rush comes along."

Mrs. Jones stated last season's crop was a bumper one on her farm; 9,000 bushels were harvested, and at prices secured by the Saskatchewan Wheat Pool, this should result a sum in the neighborhood of \$12,000 for the farmer.

"I am going back to England to visit Canada for all I am worth," she said. "It gave me a new lease of life, provided me with work I love, gave me splendid health and now furnishes me with the wherewithal for a long Christmas and New Year's holiday. It is just about a year to the day when I first arrived in the Dominion and I can truthfully say that it has been one of the best years of my life."

Now I have the offer of a dozen jobs to which I can go straight on my return to Canada in the spring."

Reason For Wembley Deficit

Badly Managed From Inside Opinion Of Toronto Paper

The promoters and backers of the Wembley Exhibition are now reckoning the cost, which it is said will be less than a million, say, a half, and which will be met out of a guarantee fund subscribed to by private persons. The exhibition at Wembley was a good exhibit from the standpoint of the visitor, the chief point against it being that it was badly handled from the inside.

First of all it was located too far from London and was too expensive to reach. Next, the publicity department was not up to its work. It failed to entice the people. Londoners as a whole paid no attention to it.

It was not many days in June last who had never entered its gates. And speaking of gates reminds me of the fact that the entrances to Wembley were from the standpoint of attractiveness, as unattractive as could be imagined.

Entrance tickets were not sold so many for so much as we are accustomed to at the Canadian National Exhibition. You want up to the turnstile with the right change, and on different days there were different entrance fees charged. If you lacked the exact change then one must hand the money changer's office! The method was crude and confusing and certainly not of a character to attract custom.

Wembley was primarily a day show place. For instance, the art gallery was not lighted and of course was compelled to close before sundown.

Wembley, on the other hand, was an eye-catcher, though burdened as it is in respect to the possibilities of the British Empire. In the long run it may well be that it was money well expended.—Toronto Saturday Night.

American Road Adopts Radio

Follows the Lead of the Canadian National in Broadcasting

Following the lead of the Canadian National Railway which was the first transportation company in the world to adopt radio as a means of strengthening its relations with the public and bringing its employees into closer contact with its officers and executives, the Illinois Central system, one of the most important lines in the United States, operating from Chicago to Gulf ports and serving considerable territory, has now added radio to its activities.

Under the leadership of WGBS at Chicago, operated by the Coyne Electrical School from the Baldwin Pione Building, and broadcasting on a wave length of 250 metres.

Children's Colds

Are best treated externally. Check their fever light without "dosing" by rubbing Vicks VapoRub over throat and chest at bedtime.

English Children Have Organic Heart Disease

Statistics Show Nearly 50,000 of School Age Afflicted

Rheumatism was the subject discussed at the last meeting of the International Society of Hydrology at London, Eng. Dr. Monod (France) said there was little rheumatism in his country, probably because of the climate. Doctors from Holland said that was prevalent there, but they had no official data. In Sweden, with a total population of 6,000,000, pneumonia were said to 3,500 persons yearly because of rheumatism.

It was calculated that in Great Britain there were between 45,000 and 50,000 children of school age with organic heart disease. In London routine inspections showed that of the children aged 12, 3 per cent. of the boys and 4 per cent. of the girls had heart defects. In the children's hospital in London, during the year 1919, it was found that of 171 cases of rheumatic fever, 16 per cent. developed heart disease, of which 22 children died and 38 were permanently invalided.

Locate Russians Who Have Never Bathed

First Man Compelled By Inspector to Wash Dried of Frigidity

Government sanitary inspectors have discovered, several hundred miles from Irkutsk, Siberia, a large community of Russians who have never washed or bathed and who have never used water for any other purpose except to drink.

When the inspectors tried to induce the natives to bathe, there was almost a riot. The first man who was compelled to bathe was reported to have died of fright.

The members of the community, who live in great isolation and under the most primitive conditions, had never even washed their clothes or their cooking and eating utensils.

Your Home Medicine Chest.—Among the standard household remedies that should always be on hand in your home medicine chest, none is more valuable than Dr. Thomas' Electric Oil. Its manifold usefulness is relieving pain and healing sicknesses known by druggists throughout the land. Always use Dr. Thomas' Electric Oil for relieving rheumatic and neuralgic pains, treating sore throats and colds, coughs, burns, scratches, cuts, bruises and sprains.

Mineral Production in B.C.

Mineral production in British Columbia for 1925 is estimated at \$42,000,000, an increase of 30 per cent. over 1924, by the British Columbia chamber of mines. The largest individual metal production is in lead, which ran up to nearly \$15,000,000. Zinc was practically 100 per cent. more in 1925, being valued at \$4,500,000. More than \$2,500,000 in dividends was paid by British Columbia mines during the year.

An Englishman took an American to see "Hamlet."

"You are sure behind the times," commented the American. "Why, I saw 'Hamlet' in New York four years ago."

How Robert M. Koenig Found Remedy for Pimply Skin

For years my skin would break out every once in a while—and it was very little to help me.

I read a doctor's article stating that pimply skin usually comes from the stomach—and I never got rid of it.

I tried Carter's Little Liver Pills for a few days—and since that time my skin is smooth and clear. Now I know my friends the right way of getting rid of a broken out skin—and also of new blemishes. I am glad to say I am now happy and free from all skin ailments.

Corn Remover can exist when Holloway's Corn Remover is applied to them. It causes it to go to the root and kills the growth.

Britain's Day Not Over

No One Worrying Particularly Over Talk of Nation's Decline

If it is in truth supposed that Britain is not so great as she used to be, the answer is that she never was. It is asserted that she has no future, the answer is that she never had. In Elizabethan days, when all those glorious forces that led to the founding of English-speaking America were just beginning to work, an old chronicler like William Harrison protested that our day was visibly over. . . . Before Armageddon, with our railway strikes, our suffragette struggles, our threats of Irish civil war, the same view was held. Germany believed it implicitly. If she had not Armageddon would never have occurred. After it, we only relaxed into our old ways and observers into their old delusions. It became common talk in France, Germany and Italy alike that Britain was ceasing to be a "Great Power"; and our commercial decline was announced, as so often before, but positively for the last time.—J. L. Garvin, in the London Observer.

The Family Physician.—The good doctor is always worth his fee. But it is not always possible to get a doctor just when you want him. In such cases, common sense suggests the use of reliable home remedies, such as Dr. Thomas' Electric Oil, which is wonderfully effective in easing inflammatory pains and healing cuts, scratches, bruises and sprains. The presence of this remedy in the family medicine chest saves many a fee.

Western Honey Production

Amount of Nectar Produced Last Year Shows Strides Industry is Making

Considerable progress has been made in the western provinces in recent years in the culture of honey. A bulletin of the department of agriculture. One beekeeper near Lethbridge, Alberta, produced more honey this year than was produced by the entire province in 1924. In Manitoba the honey crop trebled in three years and in Saskatchewan the reported crop of 1924 was over sixty-six times as large as that of 1913.

Little Helps For This Week

Be content.—Larks III, 14.

Do then content, he still before his face, at whose right hand doth reign.

Fulness of joy for evermore. Without whom all thy toil to vain. He is thy living spring, thy sun.

Make glad with life and light thy dreary days.

Be thou content.—Paul Gerhardt.

I do not think the road to contentment lies in despising what we have not got. Let us acknowledge all good, and in delight that the world holds, and be content without it. But this we can never do but by possessing the one thing—without which I do not merely say, we ought to be content, but no one can be content—the Spirit of the Father.—George MacDonald.

What "Blood Pressure" Is

Merely An Index Common to Everyone Not a Disease

In a talk broadcast from New York, Dr. Edward S. McSweney, medical director of the Telephone Company, said: "Blood pressure is a word in an index, not a disease, and everyone has a blood pressure just as everyone has a pulse. To keep it normal is largely within our own control. When abnormal, the reason can be found only by careful general examination and tests which often puzzle and worry the cleverest doctor as to their meaning before he finds the answer. You can help yourself by letting him do the worrying."

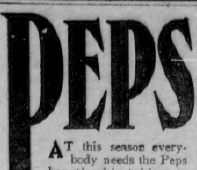

The popular saying, "One's blood pressure should be the sum of one's age plus 100," while in general true," said Dr. McSweney, "is like many such sayings, apt to be absolutely wrong when applied to any one individual. There is no such thing as a standard blood pressure to which everyone of a given age should conform. In fact, even in the individual there are daily differences; slight variations occur by reason even of changing the position from sitting down to standing up, or after meals. It is foolish, therefore, for anyone to attach importance to having lowered or raised his blood pressure a few points."

Corn Remover can exist when Holloway's Corn Remover is applied to them. It causes it to go to the root and kills the growth.

The distinction of being the first woman barrister of title is likely to fall to Lady Clifton of Leighton-Bromford, a baroness in her own right.

Occasionally one meets a man whose mind is so weak that it can't even wander.

THOUSANDS OF MOTHERS USE NO OTHER MEDICINE

Baby's Own Tablets Are the Ideal Remedy For Babies and Young Children

Canadian mothers are noted for the care they give their little ones—the health of the baby is most jealously guarded and the mother is always on the lookout for a remedy which is efficient and at the same time absolutely safe. Thousands of mothers have found such a remedy in Baby's Own Tablets and many of them use nothing else for the ailments of their little ones. Among them is Mrs. Howard King, of Truro, N.S., who says:—"I can strongly recommend Baby's Own Tablets to mothers of young children as I know of nothing to equal them for little ones."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

A French astronomer says there are 35,000,000,000 stars in the sky. Our count was thirteen more, as it is near enough.

"It Pays to Advertise"

Reception Held at H. Brewster's Home

The home of Mr. and Mrs. H.
C. Brewster was the scene of a
pleasing event on Monday eve-
ning when several old friends
gathered in honor of their
daughter, Lucile, who left on
Tuesday for San Francisco to
become the bride of Mr. Roy
Harris.

In the neighborhood of fifty
were present, when whilst and
other games were played. At
the close of the evening's plea-
sure, Mrs. Kehoe, presiding with
a few appropriate remarks pre-
sented the honor guest with a
beautiful silver entrée dish, on
behalf of the friends, to be
added to her already beautiful
array of presents, amongst
which was a beautiful tray of
Community silver, a gift from
the staff of the Royal Bank at
Edmonton.

Women's Meetings

Ladies Aid 2nd Thursday in
each month.

The W. I. meet the 1st Satur-
day in every month.

nesday at 4 p.m. at the rectory.

Mr. Miller Sleeps Like Log, Eats Anything

"After taking Adlerika I can
eat anything and sleep like a
log. I had gas on the stomach
and couldn't keep food down
nor sleep." (signed) R. C. Mil-
ler. ONE spoonful Adlerika re-
moves GAS and often brings
surprising relief to the stomach
Stomach that full, bloated feeling.
Often brings out old waste-
matter you never thought was
in your system. Excellent for
chronic constipation. Dever-
aux Drug Co.

WESTERN CANADA GOLF CHAMPION

NED MCKENNA,
golf pro. at Minkai Inn, the Cana-
dian National Railways summer
hotel at Minkai, Ont., who captured
the open and professional golf
championship of western Canada
during the recent tournament held
in Winnipeg.

Transformation for the better
wrought among the Yukon in the
last 55 years is almost unbelieve-
able, no Bishop L. O. Granger, of the
Anglican diocese of the Yukon, re-
ported on a recent visit to Edmon-
ton, Alta. The Bishop attributes
this improvement to the influence
of the missionaries and the Royal
Canadian Mounted Police.

The "Calgary process," the "newest
method of oil refining," was ex-
amined with interest by the mem-
bers of the British Association for
the Advancement of Science during
their recent visit to Calgary, Alta.
This process has become world-
famous, ever since the experiment
conducted at the local Imperial oil
refinery proved so successful.

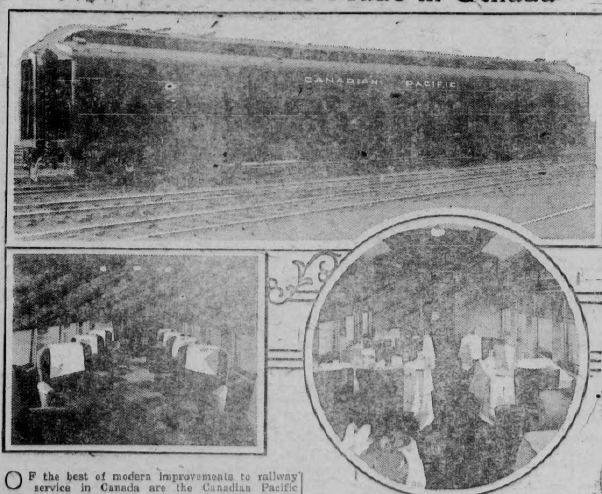

Thousands of Belgians are wait-
ing to cross the Atlantic to Canada
as soon as the Dominion can accom-
modate them, it is reported by author-
ities in touch with the situation. Bel-
gium's interest in Canada is further
evidenced by the visit to the Do-
minion of Louis Sturges, veteran
member of the diplomatic corps and
member of the Belgian Parliament
for Antwerp, who, as guest of E. W.
Bentley, Chairman and President of
the Canadian Pacific Railway, is
touring the country studying econ-
omic conditions with a view to stimu-
lating Belgian immigration.

A most interesting and attractive
volume entitled "Here and There
in Montreal" has just been publish-
ed by the Mueson Book Co. of To-
ronto. The book is well illustrated
with maps and pictures in color and
brings out many noteworthy facts,
such as that the city's total popula-
tion is 900,000, that two-thirds of
this number are French-Canadians
and that Montreal is the second part
of importance in North America.
The author is Charles W. Stokes,
Assoc. Pub. Agent of the
Canadian Pacific Railway.

The first annual Pow Wow of the
Trail Riders of the Canadian Rock-
ies, held at Yoho Camp, was a great
success. Over 200 internationally
known writers, artists, etc., rode in
to gather round the sacred fire in
the Sun Dance Lodge. Charles D.
Walcutt, secretary of the Smith-
sonian Institute of Washington,
D.C., honorary president of the
Trail Riders, addressed the gather-
ing, a poem written specially for
the occasion by Bliss Carner was
read and Chiefs Walk-in-the-Road
and Buffalo Child Long Lance per-
formed an Indian dance.

New Cars de Luxe Made in Canada

Above—Exterior Cafe-Parlor Car.
Left—Interior of the parlor.
Right—The dining room.

OF the best of modern improvements to railway
service in Canada are the Canadian Pacific
combination dining and parlor cars. The new all-
steel cars, six in number, will operate on the more
important short runs, affording every convenience
and luxury, where full size dining and parlor cars
are not required. They are the only Cafe-Parlor Cars
existent which are fitted with a smoking room, and
the revolving slumber-back chairs are another dis-
tinctive feature.

Interior decoration has been given special con-
sideration by the Company, and the new cars are an
extremely well finished product. Initial mahogany
has been used with good effect, the ceilings have a
light brown finish, and the lighting has been arranged
to permit reading in any part of the car without
strain or glare. Lamps are arranged along the centre
of the ceiling, and bracket lamps over each table and
chair, all with tracery shades, diffuse a warm glow.
The new cars are different from any others doing
service in Canada in that they are practically divided
into four separate compartments. The kitchen, fully
equipped, takes up nearly 15 feet of one end, and in
this are found a huge range with ovens and steam
tables attached. A charcoal burning grill is placed
next the range, and on the other side are the separate
refrigerators for meats, fish, fruits, milk, cream and
eggs. Every available inch of flooring seems to
be utilized, but there is room enough for three men
to work and for the carrying tables, sink, dish washer
and innumerable lockers for groceries, chinaware,
glass, silver, etc. A tank overhead supplies fresh and
filtered water for use in the dining room and kitchen.
Leaving the kitchen one comes upon a small
vestibule which opens into the dining room. Hand-

some china and silver cabinets can be seen here, and
stowed snugly into the corner is a "bar" which will
hold a surprisingly large number of bottles, and keep
them cool too, because ice may be let into a chamber
at the rear, through the roof.

The dining room is 19 feet long and seats 19
people. Three tables each accommodate four diners,
and three tables, two. Particularly when lighted, the
dining room is most beautiful. The general effect
is very rich and soft.

The parlor, over 21 feet long, contains twelve
chairs with swivel base and reclining back. There
is a good distribution of light for reading, and the
compartments is absolutely the last word in comfort.
The smoking room is reached through a short cor-
ridor, off which are the wash rooms. This is some-
what smaller, but decidedly more comfortable than
the smoking rooms of the standard sleeper or first
class coaches. It is over 7 feet long and the two
leather sofas accommodate six people with ease.

The new Canadian Pacific cafe-parlor cars have
their own heating units which is another advantage.
They are fitted with cooling fans and the ventilating
system has been so arranged as to ensure a complete
change of air every few minutes without causing
draughts.

These cars are a credit to the Canadian workman-
ship that has gone into their makeup, and will do
much to encourage travel in this part of the continent.
